

ABSTRACT OF THE DISCLOSURE

An arm accessory pack worn on the upper arm of a user and adjustable thereto. The pack has a plurality of pockets or compartments, closed off by flaps, for accommodating various accessories for use by a hiker or the like. One pocket may be for a cell phone and may have a hole for a microphone cord. Another pocket may hold a CD player or the like. Another pocket may be securely closed and hold keys, wallets, a driver's license, etc. The compartment holding the cell phone is disposed away from the body of the user.
